

Time Duration: 1 Hour

**FRONT-END (REACT.JS) TEST**

1. Build a responsive landing page for an e-commerce website using Bootstrap. Include a navigation bar, product grid, and a footer.
2. Create a React application that integrates with a payment gateway (e.g., Stripe, PayPal) for processing online payments.
3. Implement form validation in a React application using a validation library (e.g., Formik, Yup).
